## Parenting Gem: Crayon Pen

Published: 06/17/2011

» [Parenting Gems](#)

There'll be no peeling wrappers or sharpening needed to get right to the point with the Acme Studios Executive Crayon Pen (\$7.99, [www.Calendars.com](http://www.Calendars.com)). Tweens, teens and even parents will go wild for this writing instrument that looks like a crayon, but writes like a ballpoint with bold blue ink. And the best part, when you press hard, it won't crack in half. A mere twist of the pen's top gets you doodling in no time. Available in assorted colors.
