Growth Chart Art

Category: Home Interior & Accessories

Beautiful, customizable growth charts from Growth Chart Art are the only growth chart you will be comfortable to hang anywhere in your home. These pieces of functional art are not only attractive but are eco-friendly as well. You simply hang the rectangular (or fish or ski etc) shaped art on your wall with provided hardware at whatever height best suits your family. The Inch markers are discretely indicated on the side and a marker is included to note your child or children's growth. They come in many different styles and can be personalized with one or more names. They are versatile because one size fits all with being able to hang at whatever heights suits your family's needs and you can take with you and rehang (at the same height) to bring memories with you! Made using soy based inks, no-VOC paints and re purposed wood.
