Growth Chart Art

How many of you have [kids growth charts](#)? Do you just mark a doorway? Let me tell you about Growth Chart Art.

Growth Chart Art sent me this wonderful chart. It is part of their [wooden growth charts](#) collection. I love it. I love that the design is natural so I can use it for both of my children. The Growth Chart Ruler is customizable so you can decide where to hang it. Which works great for me because I'm short. The materials are eco-friendly (another plus) and the company is woman-owned.

Growth Chart Art carries a large selection of [children's growth charts](#) that range in price from \$49-\$89. These are products you keep for a lifetime. I loved that their [personalized growth charts](#) can be personalized with more than one name.

BUY IT: You can buy Growth Chart Art [online](#).
